Understanding Abortion Laws in Abu Dhabi & the UAE

Abortion is heavily restricted in the UAE, permitted only under specific circumstances, such as when the mother's life is at risk or if the pregnancy poses a severe threat to her health. Performing or attempting an abortion outside of these legal parameters can lead to severe legal sanctions, including fines and imprisonment.

Always consult a doctor before taking abortion pills. While Mifepristone and Misoprostol are the most common medications, unsupervised use can be unsafe and is likely illegal.

Why Patients Trust Us

Abortion Pills in Abu Dhabi: What You Need to Know

Are you looking for pills for a self-managed abortion in Abu Dhabi? You have landed on the right page. We offer a range of approved medications to cleanse the womb and ensure patients have no negative side effects.

Our main objective is to help women avoid undesired pregnancies, allowing more control over their reproductive choices. We provide abortion pills that work efficiently for up to 24 weeks.

Products Available:

- Mifegest Kit (Unwanted 72): This kit includes Mifepristone and Misoprostol, the standard medications for medical abortion.
- Cytotec: Another important pill for abortion, which can be hard to find in the UAE. We are ready to deliver Cytotec in Abu Dhabi.

Start your treatment with Mifepristone. This medicine blocks progesterone, which is necessary to support a pregnancy. The Mifegest Kit also often includes antibiotics to prevent infection.

Consult a qualified healthcare professional before use. The correct dosage should be taken as suggested, and you should be aware of potential side effects like nausea, cramping, and bleeding.

Trusted Gynecologists for Safe Abortion Care

Our team of gynecologists consists of highly qualified and experienced specialists dedicated to providing safe, confidential, and compassionate abortion care.

- Dr. Depali: Senior Gynaecologist with over 20 years of experience.
- Dr. Emma: Specialist in reproductive medicine with over 20 years of experience.
- Dr. Alex: Emergency care specialist focused on post-abortion recovery.

Planning Your Abortion Journey in Abu Dhabi

We assist with every step to ensure a stress-free experience. Our team helps with:

- Travel and Visa: Free assistance for international visitors needing a Medical Visa.
- Accommodation: Helping you book a hotel near the clinic.

- Transportation: Providing transport from the airport to the hospital.

- Price: We offer competitive and reasonable prices for abortion pills.
- 100% Guaranteed Pills: We provide FDA-approved abortion pills from authentic manufacturers.
- Coverage: We are available across the UAE, including Abu Dhabi.
- Privacy: We will not ask for your personal details to ensure complete anonymity.
- Placing Order: Easy order placement via WhatsApp, email, or phone.

Frequently Asked Questions (FAQs)

What is the max penalty for abortion in UAE?

Under Article 391 of the UAE Penal Code, a pregnant woman who intentionally aborts can face up to one year in prison and/or fines of at least AED 10,000.

How can I place an order for abortion pills in Abu Dhabi?

Contact us on WhatsApp at +971502467062. We are available 24/7 and offer discreet doorstep delivery.

Is medical abortion safe?

Yes, when done in early pregnancy (up to 10 weeks) under proper medical guidance, it is over 95% effective and considered very safe.

Can I do this at home?

Yes, home-based medical abortion is widely practiced, but doctor consultation is crucial, especially to rule out ectopic pregnancy or contraindications.

Medical Abortion Is Not Recommended If You:

- Have an ectopic pregnancy
- Use an IUD
- Have anemia or bleeding disorders
- Are over 10 weeks pregnant
- Lack access to emergency medical care

Do I have to reveal my identity to buy abortion pills?

No! We do not ask for personal details like passport numbers, email addresses, or names. You can place your order without revealing your identity.

How will I know it worked?

Bleeding and cramping are signs of the process. You should do a follow-up ultrasound or blood test after 1–2 weeks to confirm.

Are there long-term side effects?

No, medical abortion does not affect future fertility or menstrual cycles in most women.
