MEDICAL ABORTION INSTRUCTIONS

MEDICAL ABORTION INSTRUCTIONS

Mifepristone & Misoprostol Kit - UAE

Support: +971-55-6394-139

STEP 1: BEFORE TAKING MEDICATION

- Confirm pregnancy via test or ultrasound
- Calculate gestational age (from first day of last period)
- Do NOT use if pregnancy exceeds 12 weeks
- Have painkillers ready (Ibuprofen 400mg)
- Arrange for 2-3 days rest

STEP 2: MIFEPRISTONE (Day 1)

- Take 200mg (1 tablet) orally with water
- Eat light meal beforehand
- Expected: Minimal symptoms, possible light nausea
- Wait 24-48 hours before Step 3

STEP 3: MISOPROSTOL (Day 2 or 3)

- Take 800mcg (4 tablets of 200mcg)
- Method: Place 2 tablets in each cheek pouch
- Let dissolve for 30 minutes, then swallow remainder
- Expected within 1-4 hours: Cramping and bleeding

WHAT TO EXPECT:

- Heavy bleeding with clots (normal)
- Cramping similar to strong period pain
- Possible nausea, diarrhea, mild fever
- Process usually complete within 6-24 hours

WARNING SIGNS - SEEK IMMEDIATE HELP:

- Bleeding through more than 2 pads/hour for 2+ hours
- Fever above 38°C lasting over 24 hours
- Severe pain not relieved by medication
- No bleeding within 24 hours of misoprostol

AFTERCARE:

- Rest for 48 hours
- Avoid intercourse for 2 weeks
- Follow-up appointment in 7-14 days
- Pregnancy test after 3 weeks to confirm
